Danfoss Position Statement on REACH

The Danfoss Group supports the objective of REACH (Registration, Evaluation, Authorisation and restriction of Chemicals, 1907/2006/EC) to further improve the European Union's chemicals regulatory system, including the aim to advance public health and safety as well as the protection of the environment.

Danfoss is neither a manufacturer nor an importer of chemicals and the company does not manufacture articles with intended release of substances.

Danfoss is aware of the obligation proactively to inform our customers should a substance used by Danfoss in excess of the limit value appear on the candidate list. All relevant information will under such circumstances be communicated in accordance with this obligation.

At Danfoss we have set up a process to ensure continued REACH compliance. Responsibilities and appropriate resources have been assigned to assess the continuously updated candidate list and the updates of Annex XIV in relation to our products. Danfoss' corporate REACH organization will ensure appropriate and timely handling of such updates.

Danfoss does not provide any analysis data for our products as this is not a requirement in the REACH or RoHS legislation. A standardized analysis program would be very prohibitively because of the diversity of our products. We will, however, in cases where it could be relevant, consider testing to be carried out. These cases will be based on agreement with relevant customers or authorities.

All Danfoss manufacturing facilities are ISO 14001 certified, in which compliance to national and international environmental legislation is part of the third party certification procedure.

Any inquiry regarding REACH should be directed to the Danfoss sales office where products are bought or to Danfoss' REACH helpdesk at REACH@Danfoss.com.
