Wholesaler Stocking Locations

Now it's easier than ever to purchase Danfoss refrigeration components. We've teamed with local and national wholesalers to provide ready access to reliable, high quality Danfoss components. A full array, including KPU pressure controls, the TU family of expansion valves, and many more Danfoss products, can be found at over 400 stocking wholesalers across the USA and Canada.

Full service wholesaler locations have a complete line of Danfoss products on hand, including solenoid valves, Eliminator® filter driers, Performer® Scroll compressors and many more. And by special order, any of our wholesale partners can easily get fast delivery from our fully-stocked warehouse in Baltimore.

To find an authorized Danfoss wholesaler, simply go to www.danfoss.us/foodretail and click on the 'Aftermarket Contractor Corner' link on the left hand side of the page. From there you can click on the 'Authorized Wholesaler' link and search for a location by entering your zip code.

We also encourage you to visit our wholesaler partners' web sites to find more information, including store locations, hours, and directions.

If you can not find an authorized stocking location near you, please contact Customer Service at 1-888-Danfoss. We will work with your local supplier to stock Danfoss parts.

KPU pressure controls & thermostats

We invite you to stop by your local distributor and check out the Danfoss KPU display. We listened to contractors and OEMs, and with their involvement throughout the process, we redesigned our pressure and temperature switches. The result is a pressure control that is easier to install, safer, easier to service, and more reliable.

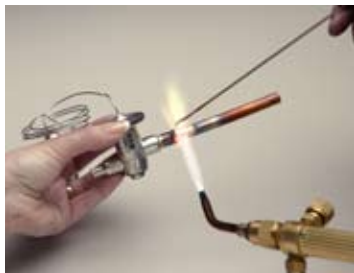

- No wire bending or forming: cable entry is aligned with push-in terminals
- A unique failsafe double bellows protects against leaks
- Test contact operation safely with a fingertip -- not with a screwdriver
- Contacts are visible, with snap action that eliminates welding
- A wider, easier to read indicating scale
- High current contact ratings: 24FLA
- Adjustable with a standard refrigeration wrench

TU series thermostatic expansion valves

Also available at all stocking distributors are the ever more popular Danfoss TU series expansion valves. With fast installation (no wet wrap needed), precision, and repeatability, valves in the TU series valves feature:

- Stainless steel body construction
- Stainless steel capillary tubes for easier installation and more vibration resistance
- One valve body with 10 orifice sizes...
- Optimum valve selection from minimum truck stock
- Bi-metal connections (lowers stress on valve when soldering)
- Laser welded power head for a stronger diaphragm and longer valve life
- Available with manual adjustment or fixed superheat
