

DrivePro™

Professional Drive Support

DrivePro™ Plus Program

DrivePro™ Plus drive replacement contracts provide a quick, turn-key solution for replacing aging drives that are no longer economical to repair. DrivePro™ Plus packages are designed to re-use existing bypass options and enclosures where possible to minimize the costs of replacement. Several pre-engineered packages are available to streamline the upgrade process with minimal change to the existing installation.

DrivePro™ Plus contracts include:

- World-renowned Danfoss VLT® Series drive
- Installation service
- Removal of the existing drive
- Startup service
- 2nd day shipping
- 36-month parts, labor and travel warranty

An optional one to three years of additional warranty coverage is available, extending the total coverage to as many as six years.

Simplify your operation

Replacing your old equipment increases the reliability and effectiveness of your system with the latest technology and all of the newest drive features. DrivePro™ Plus can make this process easy. One call and one price ensure quick replacement without additional subcontracting arrangements or expenses.

DrivePro™ Plus allows you to replace your aging drives with VLT Series drives, featuring the latest technology and an exceptionally user-friendly, award-winning interface.

DrivePro™ Plus Program

Danfoss offers several pre-engineered solutions that minimize the time and effort required to upgrade older drives. One example is the DrivePro™ 1703 PLUS kit, which replaces the drive and option panel of aging Graham 1703 drives without disturbing the existing conduit.

The 1703 replacement kit includes a current-generation replacement drive and a preassembled 3-contactor bypass panel. Three frame sizes are available, designed to fit the three most common 1703 NEMA 1 enclosure sizes.
